Re:

FCC Form 481 - High-Cost Support Information and Low-Income Support Information

Pursuant to 47 C.F.R. §§ 54.313(a)-(g) and 54.422(a)

Dear Secretary Dortch:

Pursuant to 47 C.F.R. §§ 54.313(a)-(g) and 54.422(a) of the Federal Communication Commission's regulations, please find enclosed the FCC Form 481 for Mukluk Telephone Company, Inc. This form was also filed at the Regulatory Commission of Alaska (RCA) and USAC.

Mukluk Telephone Company, Inc. seeks confidential treatment for its financial information pursuant to the Protective Order, Connect America Fund, et al., WC Docket No. 10-90 et al., (Nov. 16, 2012). A redacted version is also being filed this date via the FCC's Electronic Comment Filing System. In addition, attached is a letter requesting confidential treatment under 47 C.F.R. §§ 0.457 and 0.459 of the initial § 54.202(a) Five-Year Service Quality Improvement Plan.

Please do not hesitate to contact me if you have any questions or I may be of any assistance.

Sincerely,

DYKEMA GOSSETT PLLC

Re: FCC Form 481 - High-Cost Support Information and Low-Income Support Information Pursuant to 47 C.F.R. §§ 54.313(a)-(g) and 54.422(a)

Dear Ms. Dortch:

Pursuant to the Protective Order in Connect America Fund, et al., WC Docket No. 10-90 et al. (Nov. 16, 2012) and 47 C.F.R. §§ 0.457 and 0.459, Mukluk Telephone Company, Inc., by its attorneys, hereby requests that certain materials and information be withheld from public inspection. Specifically, Mukluk Telephone Company, Inc. request confidential treatment of the Five-Year Service Quality Improvement Plan (the "Plan") attached to its Form 481 filing.

In support of its request for confidential treatment and pursuant to the requirements under 47 C.F.R. § 0.459(b), Mukluk Telephone Company, Inc. states the following:

1. Identification of the specific information for which confidential treatment is sought.

Mukluk Telephone Company, Inc. seeks confidential treatment of the Plan attached to the Form 481 filing accompanying this letter. The Plan contains sensitive financial information about Mukluk Telephone Company, Inc. as well as information about Mukluk Telephone Company, Inc.'s projected network improvements and upgrades for voice and broadband services during the period from 2015 through 2019.

2. Identification of the Commission proceeding in which the information was submitted or description of the circumstances giving rise to the submission.

The documents are being submitted as part of the annual Eligible Telecommunications Carrier ("ETC") Report (Form 481) mandated by 47 C.F.R. § 54.313.

Dykema

Ms. Marlene Dortch, Secretary July 1, 2014 Page 2

3. Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged.

The data described is highly confidential and sensitive commercial and financial information which constitutes trade secrets or sensitive commercial and financial information that would "customarily be guarded from competitors" and is therefore exempted from mandatory disclosure under FOIA Exemption 4 and 47 C.F.R. § 0.457(d).²

4. Explanation of the degree to which the information concerns a service that is subject to competition.

The Plan relates to voice and broadband services provided by Mukluk Telephone Company, Inc. that are subject to competition from competitive local exchange carriers, cable television system operators, electric power utilities, fixed and mobile wireless service providers, and/or satellite carriers.

Specifically, the Plan sets forth in detail the services provided by Mukluk Telephone Company, Inc. over its existing network including location of customers, as well as planned network improvement and maintenance for 2015 through 2019, including project dates, populations impacted by the improvements and upgrades, and projected capital costs associated with maintaining the network. This information is competitively sensitive information related to the company's existing network and planned upgrades and maintenance, and would benefit Mukluk Telephone Company, Inc.'s competitors if they were able to have access to this information.

5. Explanation of how disclosure of the information could result in substantial competitive harm.

Disclosure of the Plan is likely to result in substantial competitive harm to Mukluk Telephone Company, Inc. because the Plan could provide competitors with commercially sensitive insights related to Mukluk Telephone Company, Inc.'s operations, service offerings, and costs.

6. Identification of any measures taken by the submitting party to prevent unauthorized disclosure.

Mukluk Telephone Company, Inc. does not make the Plan or any of the information contained therein publically available in any way. The Plan is only made available to key

² 5 U.S.C. § 522(b)(4).

¹ 47 C.F.R. § 0.457(d)(2).

Dykema

Ms. Marlene Dortch, Secretary July 1, 2014 Page 3

employees with a direct need-to-know basis. This production has been completed by outside counsel.

7. Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties.

Mukluk Telephone Company, Inc. does not make the Plan available to the public and it has not previously allowed disclosure of the Plan to third parties that are not otherwise bound by confidentiality obligations.

8. Justification of the period during which the submitting party asserts that the material should not be available for public disclosure.

The Plan should be treated as confidential for an indefinite period, as Mukluk Telephone Company, Inc. will always be subject to competition and the competitive harms associated with the disclosure of the Plan.

9. Any other information that the party seeking confidential treatment believes may be useful in assessing whether its request for confidentiality should be granted.

None.

In order to provide adequate protection from public disclosure, Mukluk Telephone Company, Inc. requests that the Commission strictly limit distribution of the Plan within the Commission on a "need to know" basis and not allow any distribution outside of the Commission. In the event that any person or entity outside of the Commission requests disclosure of the Plan, Mukluk Telephone Company, Inc. requests that it be so notified immediately so that it can oppose such request or take other action to safeguard its interests as it deems necessary and appropriate.

Please do not hesitate to contact me if you have any questions or I may be of any assistance.

Sincerely,

DYKEMA GOSSETTPLLC

Shannon M. Heim

CONFIDENTIAL NOT FOR PUBLIC INSPECTION

Five-Year Network Improvement Plan For Mukluk Telephone Company, Inc.

In its *USF/ICC Transformation Order* and subsequent Orders, the Federal Communications Commission ("FCC" or "Commission") requires Eligible Telecommunications Carriers ("ETCs") to submit a five-year build-out plan in a manner consistent with Section 54.202(a)(1)(ii) of the Commission's Rules by July 1, 2014 and to submit annual progress reports thereafter. Section 54.202(a) (1) (ii) states in part that ETCs are to [s]ubmit a five-year plan that describes with specificity proposed improvements or upgrades to the [ETC's] network throughout its proposed service area Each [ETC] shall estimate the area and population that will be served as a result of the improvements..."²

In its *March 5, 2013 Order*, the FCC specified that for rate-of-return carriers, the five-year plans "should describe the carrier's network improvement plan, which should provide greater visibility into current plans to extend broadband service to unserved locations in rate-of-return service territories." Mukluk Telephone Company, Inc.

Reasonable Rates for Local Exchange Carriers; High-Cost Universal Service Support; Developing a Unified Intercarrier Compensation Regime; Federal-State Joint Board on Universal Service; Lifeline and Link-Up; Universal Service Reform—Mobility Fund; WC Docket Nos. 10-90, 07-135, 05-337, 03-109, CC Docket Nos. 01-92, 96-45, GN Docket No. 09-51, WT Docket No. 10-208, Report and Order and Further Notice of Proposed Rulemaking, FCC 11-61 (rel. Nov. 18, 2011) (USF/ICC Transformation Order) at Para. 587; pets. for review pending sub nom. In re: FCC 11-161, No. 11-9900 (10th Cir. filed Dec. 8, 2011); see also Connect America Fund et al., WC Docket 10-90 et al., Order, DA 12-147 (rel. Feb. 12, 2012) at Para. 5 (amending Section 54,313(a)(1) to clarify this requirement); Connect America Fund et al., WC Docket 10-90 et al., Third Order on Reconsideration, FCC 12-52 (rel. May 14, 2012) at Para. 10 (changing the filing deadline for the annual reports from April 1 to July 1); Connect America Fund et al., WC Docket 10-90 et al., Order, DA 13-332 (rel. Mar. 5, 2013) ("March 5, 2013 Order") at Para's. 4, 6-9. Delaying Five Year Plan until July 1, 2014 see WC Docket No. 10-90, Order, DA 13-1115, Para. 8 (released May 16, 2013).

² 47 C.F.R. § 54.202(a) (1) (ii).

³ March 5, 2013 Order at Para. 9 citing Section 54.202(a) (1) (ii).

("MTC" or the "Company") is a rate-of-return carrier ETC and hereby submits its fiveyear network improvement plan.

I. The Challenges Faced by the Company in Providing Voice and Broadband to its Rural Service Area

A. Description of the Company and its Service Area

Mukluk Telephone Company, Inc. was purchased in 1992 by TelAlaska, a company that had been providing dial tone to some of the most remote, rugged and culturally diverse geographic areas in the United States since 1968. MTC provides service to 13 communities, including Nome, Alaska as well as six villages located along the Iditarod Sled Dog Trail; and Little Diomede Island in the Bering Sea, just 2.6 miles from Russia. None of the Alaskan communities that Mukluk serves are accessible by road.

Today Mukluk Telephone Company, Inc., through its affiliate TelAlaska NetWorks, is a provider of Internet services for both residents and businesses with a complete range of advanced voice and data network solutions.

B. The Exchanges Contained Within the Company's Study Area

Mukluk Telephone Company, Inc. serves the combined exchange area(s) of:

Elim	Shishmaref		
Golovin	St. Michael		
Koyuk	Stebbins		
Little Diomede	Teller/Brevig Mission		
Nome	Wales		
Shaktoolik	White Mountain		

II. The Company Has Used and Will Use Universal Service Support Only For the Intended Purposes

Section 254(e) of the Communications Act of 1934, as amended requires ETCs to use Universal Service support ("USF") "only for the provision, maintenance, and upgrading of facilities and services for which the support is intended."⁴ Pursuant to Section 54.314 of the FCC's rules, in order for state-designated ETCs to receive USF for the coming year, states must annually file certifications by October 1 stating that all federal high-cost support provided to such carriers within the state "was used in the preceding calendar year and will be used in the coming calendar year only for the provision, maintenance, and upgrading of facilities and services for which the support is intended." ETCs not designated by a state must file similar certifications with the FCC.

In its USF/ICC Transformation Order, the FCC clarified that prior to making the Section 254(e) certifications, states should conduct a "rigorous examination of the factual information" contained in the annual Section 54.313 reports, of which the five year network improvement plan and annual progress reports are a part, in determining whether they can certify that carriers' support has been used and will be used only for the purpose for which the support was intended.⁷ The FCC said that it would also use the reports to verify certifications filed by ETCs that are not state-designated.8 In this context, the Commission stated, "[i]n light of the public interest obligations we adopt in this Order, a

⁴ 47 U.S.C. § 254(e). ⁵ 47 C.F.R. § 54.314(a).

^{6 47} C.F.R. § 54.314(b).

⁷ See USF/ICC Transformation Order at Para. 612.

⁸ Id.

key component of this [Section 254(e)] certification will now be that support is being used to maintain and extend modern networks capable of providing voice and broadband service."

Essentially, under the existing rules and processes, the federal USF received by the Company and other incumbent rural telephone companies are, in fact, an integral part of the recovery of expenditures of rural incumbent local exchange carriers incurred in the provision, maintenance and upgrading of their provision of facilities and services for which the USF is intended. Mukluk Telephone Company, Inc. depends upon its receipt and utilization of federal universal service support to provide rural telephone customers with affordable and quality voice and broadband services.

Accordingly, given the critical role the network improvement plan and the progress reports will have in the annual Section 254(e) certification process, Mukluk Telephone Company Inc's plan and progress reports will demonstrate not only how the Company has used and will use USF not only for improvements and upgrades, but also for the provision and maintenance of the facilities and services to which the support was intended.

⁹ *Id.* (emphasis supplied).

III. The Company's Five-Year Network Improvement Plan

When the Commission adopted its five-year plan requirements for FCC-designated ETCs in its 2005 ETC Order, it clarified that service quality improvements in the five-year plan "do not necessarily require additional construction of network facilities." .¹⁰ Accordingly, the improvements listed in the plan may be projects related to the expansion of the network (one or multiple services), projects related to updating technology to accommodate new services or higher bandwidth or maintenance projects, such as to reduce trouble reports or replace outdated equipment. Additionally, in some cases, the projects may be ones that improve or upgrade the entire network rather than discrete areas within a study area or they may be ones that are ongoing projects that have no specific start and completion dates.

The instructions to the Form 481 state "[r]ecipients may describe where improvements are expected to occur by wire center or census block, as appropriate. To the extent no improvements are planned in specific areas, the five-year plan should so indicate." The instructions also require that in subsequent annual progress reports which must include the total amount of universal service support received must provide this information "broken out separately by the amount spent on capital expenses and the amount spent on operating expenses." Accordingly, the Company's five-year plan separately provides both capital expenditures and operating expenses.

¹⁰ Federal-State Joint Board on Universal Service, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) ("2005 ETC Order").

¹¹ Instructions for Completing FCC Form 481, OMB Control No. 3060-0986 (High-Cost), OMB Control No. 3060-0819 (Low-Income), July 2013, Line 112

¹² Instructions for Completing FCC Form 481, OMB Control No. 3060-0986 (High-Cost), OMB Control No. 3060-0819 (Low-Income), July 2013, Line 112

MTC advises that this improvement plan has been carefully crafted, matching measured network deployment, improvement and quality service levels with known financial implications of the Transformation Order upon the company's support cashflows. The uncertainty of such cash flows being received in the outer-years as a result of current and potential regulatory action on rural rate-of-return carriers has resulted in the Company taking a balanced yet realistic approach.

The environment in which the Company operates remains dynamic, not static. As a result, Mukluk Telephone Company, Inc. reserves the opportunity to modify its plan in response to further regulatory decisions as they are adopted, and their implication upon the Company's financial viability in providing the required services and service level quality becomes known.

The Company will re-evaluate this plan on an annual basis. Action, however, may also be taken abruptly on the presented plan for both current and outer years in the event of evolving regulatory conditions and/or changes in technology (vendor)-driven support. All adjustments to the improvement plan in this document will be reflected and explained in subsequent annual progress reports.

A. The Company's Major Network Improvement Projects

Based upon this framework, Appendix A reflects Mukluk Telephone Company Inc.'s major network improvement projects for the five calendar years 2015 through 2019, areas and population associated with those projects and voice and broadband relationship. The 5 year network improvement plan will describe how MTC plans to improve, upgrade, and maintain its telecommunications network over the period serving all communities in its study area. MTC study area includes 12 exchanges as provided in Section I. B. of this document. MTC's study area reaches a population base of 7,254. Projects described below will be started and completed in the project year. Due to the current uncertainty of the amounts of support funds the company may receive in future years, MTC advises the Commission that the deployment of specific network improvement projects may be modified, and the meeting of projected service goals muted, to accommodate the actual amount of support that will be received.

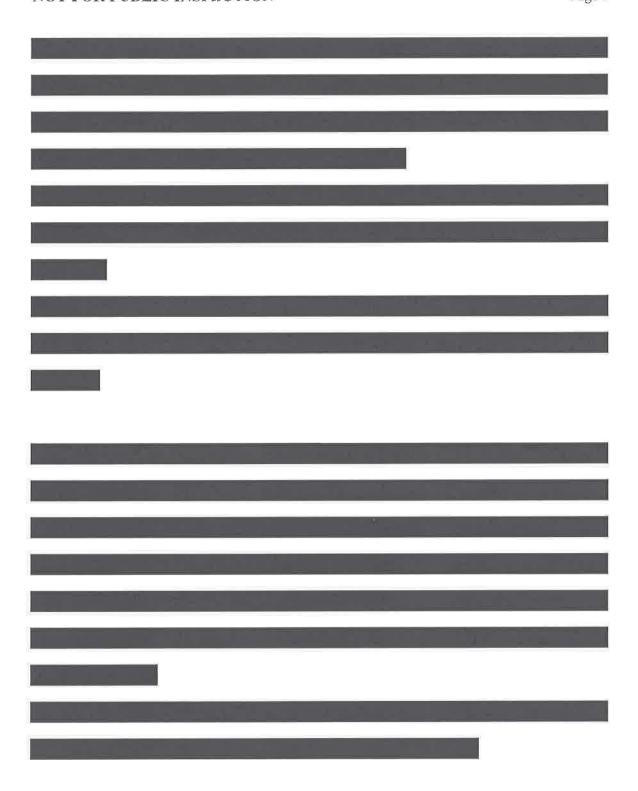

B. How These Projects Will Improve the Network

	W		
4	The same

^{13 2010} Census

CONFIDENTIAL NOT FOR PUBLIC INSPECTION

C. Part 32 and Yearly Breakdown of Estimated Capital Expenditures Associated with the Projects and Operating Expenses

Appendix B included herein specifies the projects listed in Appendix A in terms of the Part 32 capital expenditures categories and in terms of the years in which the costs are expected to occur along with depreciation expense associated with the capital expenditures. In a separate section, the projected operating expenses are provided.

D. Determination of Reasonableness

In its *March 5, 2013 Order*, the Commission stated, "We encourage rate-of-return carriers to explain in their five-year plans what criteria the carrier will use to determine whether a request for broadband is reasonable and how the carrier will decide which areas are feasible to extend terrestrial broadband service to, and which areas are not feasible to serve with terrestrial technologies, given current funding levels." Mukluk Telephone Company, Inc. hereby responds to the Commission's invitation and provides the following:

None of the Mukluk Telephone Company exchanges are connected by roads and all are served by satellite backhaul facilities. All locations are able to support the broadband service level of IMbps downstream/256kpbs upstream. Nome and Shaktoolik both have microwave middle mile access but are not able to support the broadband service level because of cost prohibitive backhaul facilities¹⁵. Per the 3rd Order on Reconsideration the Federal Communications Commission has acknowledged this issue at Paragraph 46¹⁶ and in reference to Five-Year Build Out Plans the March 5, 2013 Order FCC DA 13-332 at Paragraph 11¹⁷.

¹⁴ March 5, 2013 Order at Para, 10.

¹⁵ FCC 12-52 paras. 45-46

¹⁶ 46. We appreciate the concerns raised by the Alaska Rural Coalition and ACS that it may not be cost-effective to serve certain customers due to the high cost of backhaul. Rather than granting a blanket exemption of the broadband obligations established for rate-of-return companies in the USF/ICC Transformation Order, we clarify, as the Alaska Rural Coalition requests, that our current rules provide sufficient flexibility to take into account any unique circumstances that may impact the ability of rate-of-return companies to extend broadband to their customers, including backhaul costs. As the Coalition notes, rate-of-return carriers are required to provide service meeting the specified characteristics on reasonable request, which, the Commission explained in the Order, was an obligation similar to the voice deployment obligation many of those carriers were already subject to. This obligation, enforced in the first instance by the relevant ETC-designating authority (generally the state), permits these entities to take into account backhaul costs or other unique circumstances that may make it cost-prohibitive to extend service to

MTC continues to seek economically sound solutions to address the provisioning of required broadband speeds given the extremely high costs of middle mile.

particular customers, in Alaska or any other area. We intend to carefully monitor developments in this regard and will consider making further clarifications or revisions if necessary.

¹⁷ 11. The Bureau does not expect a rate-of-return carrier to plan to build out terrestrial wireline broadband service to all locations within its study area. The Commission has recognized that there are some areas of the country where it is cost prohibitive to extend broadband using terrestrial wireline technology, and that in some areas satellite or fixed wireless technologies may be more cost effective options to extend service.34 Indeed, we are aware anecdotally that rate-of-return carriers today use a mix of technologies to serve their customers.35 For that reason, we expect rate-of-return carriers to develop plans that reflect the cost characteristics of their service territories and current funding levels, setting forth what sort of broadband service build-out is reasonable over the five-year time period.

Mukluk Telephone Company, Inc.

500: Service Quality Standards & Consumer Protection Rules Compliance

510: Mukluk Telephone Company, Inc certifies that it is in compliance with applicable consumer protection and service quality standards as set forth in Alaska Administrative Rules 3 AAC 53.450 and consumer protection rules as defined in 47 CFR Part 64 Subpart U, Customer Proprietary Network Information and the Federal Trade Commission Red Flag rules to prevent identity theft. A manual for each of those programs is in place and is part of the employees' handbook. Employee training is conducted and new hires are instructed on the programs as required by their job functions.

Mukluk Telephone Company, Inc.

600: Functionality in Emergency Situations

610: Mukluk Telephone Company, Inc certifies that it has and will continue to take steps to remain functional in emergency situations in compliance with requirements set forth in 47 CFR 54.202(a)(2).

Mukluk Telephone Company, Inc has twelve telecommunication local exchange serving areas. It uses (central office) switches from two different manufacturers (vendors) to provide the service. The manufacturers are Redcom and Genband (formerly Nortel). Additionally, two of its switches have remote nodes. The node manufacturers include Calix (formerly Occam) and AFC. Each central office and interconnecting network equipment site contains provisions for reserve power to keep all equipment operating without interruption at the busy-hour load following any failure of the primary electric power source. All switches have 12 hour battery back-up. The Nome switch (Nortel) has a back-up generator which will provide power indefinitely. The nodes have 8 hour battery back-up.

At all of Mukluk Telephone Company, Inc's local exchange service areas, it provides a stand-alone switch (not connected to other central offices) directly connected to two separate IXCs. There are separate cable routes to each IXC in 9 of the locations (3 are on the same facility without redundancy). If either route is damaged access to long distance is attainable through a dial around process. All of Mukluk Telephone Company, Inc's switches are non-blocking and capable of handling traffic spikes resulting from emergency situations.

Mukluk Telephone Company, Inc has established procedures to be followed by its employees in the event of emergencies.

920: Tribal Engagement Document

Tribal lands in Alaska are defined differently than what typically is used to describe tribal lands and tribal authority in the contiguous 48 States. Alaska Native Regions were not carved out of existing reservations and occupy a different legal status than allotments which are defined as Indian Country under 18 USC Sec. 1151. They include all Alaska Native Regions established pursuant to the Alaska Native Claims Settlement Act. (ANCSA), 43 U.S.C Sec. 1601. ANCSA lands do not qualify as Indian Country. This Act extinguished the Alaska tribes' aboriginal title to land, while creating village and regional corporations that received title to certain lands within 12 geographic regions of the state. The shareholders of those ANCSA corporations are primarily tribal members and their descendants. The ANCSA regions consist of the entire State of Alaska and are defined as tribal lands.

TelAlaska, Inc. subsidiary, Mukluk Telephone Company, Inc. (MTC) is a public utility corporation (Certificate No. 253) providing local exchange telephone service to the following communities: Elim, Golovin, Koyuk, Little Diomede, Shaktoolik, Shishmaref, St. Michael, Stebbins, Teller/Brevig Mission, Wales, White Mountain and Nome. These remote and very rural Alaskan native communities are located on the Seward Peninsula and an island in the Bering Sea in western Alaska.

921: Needs Assessment and Deployment Planning with Focus on Anchor Institutions

MTC strives to work in conjunction with its Alaskan Native community leaders and anchor institutions to assess, plan and deploy telecommunication facilities in its exchange service areas. During 2013, MTC undertook the following steps to communicate with its Alaskan Native community: Using its assembled list of native leaders with contact information for all of federally recognized tribes in MTC's serving areas from the Federal Register, Brenda Shepard, CEO and Dave Goggins, V.P.Operations initiated direct contact via phone calls to native leaders, covering each of MTC's exchanges. The purpose of these calls was to discuss and describe the Tribal Government Engagement Obligation as reported in the July 19, 2012 FCC Public Notice and open or continue a dialogue with the local leaders. During these direct conversations, the native community leaders offered direct and candid feedback on the quality of MTC's voice and broadband services to their community as well as what if any concerns they may have regarding new service opportunities. The President of the Stebbins Community Association noted his appreciation for MTC's efforts in helping restore and maintain communication services in his community after particularly vicious winter storms created treacherous conditions leading to the State to declare it a disaster area. Also discussed was MTC's cooperation with the community, State and FEMA in developing plans to mitigate future outages caused by severe storms. Employment opportunities for local hire were discussed. Ms. Shepard and Mr. Goggins shared MTC's plans on future network activity and provided the native leaders with direct contact information for any future discussions.

922: Feasibility and Sustainability Planning Tribal Land Network

See narrative response to 921.

923: Marketing Services in a Culturally Sensitive Manner

Mukluk Telephone Company, Inc. staff has strived to devise marketing strategies that are culturally sensitive. Given that all of MTC's customers reside on Alaska Native Region lands, the intent of its marketing strategy is to appeal to, and be appropriate for, Alaskan Natives. MTC management and staff have attended regularly scheduled monthly community events and meetings. In addition, MTC staff work directly with local leaders and residents in the communities, which keeps MTC's marketing message continually fresh, relevant, and sensitive to the culture of those currently served and to be served in the future. Marketing materials also feature photos of Alaska Native families rather than purchased images from stock photo companies.

924: Rights-of-Way Processes

MTC obtains Right of Way permits from the State of Alaska, Federal agency or tribal organization which has the legal ROW authority over these lands. Local village administrations are also contacted as applicable before accessing roads, easements or private property, informed of the intended project and offered opportunities for feedback. MTC engineers design plans to ensure total compliance with all Right of Way permitting requirements.

925: Compliance with Land Use Permitting Requirements

MTC complies with all federal, state and/or local land use permitting requirements as applicable. There are no known specific tribal permitting requirements. As a component of its telecommunications infrastructure deployment planning process, MTC communicates with local village council representatives to inform them of planned land uses, provides a map of the impacted areas, offers opportunities for feedback and if applicable, obtains a letter of non-objection for placement of network facilities.

926: Compliance with Facility Siting Rules

MTC works to ensure that all required facility siting rules, federal, state, and other are completed to the satisfaction of these governmental authorities and consistent with the needs of the Alaska Native communities.

927: Compliance with Environmental Review Processes

MTC works to ensure that all required environmental assessments, federal, state, and other are completed to the satisfaction of these governmental authorities and consistent with the needs of the Alaska Native communities.

928: Compliance with Cultural Preservation Review Process

As an Alaskan company, MTC has the highest sensitivity regarding preserving the cultural integrity of the land. Understanding that Alaska native lands are rich with artifacts and ancient burials, MTC ensures that applicable cultural preservation requirements are always followed.

929: Compliance with Tribal Business and Licensing Requirements

N/A. MTC complies with all business and licensing requirements of the State of Alaska.

Mukluk Telephone Company, Inc.

- 1200: Terms and Condition for Lifeline Customers
 - Mukluk Telephone Company, Inc provides local wireline voice telephony service to eligible Lifeline subscribers.
- 1221: Information describing the terms and conditions of the local wireline voice telephony service offered to Lifeline subscribers by Mukluk Telephone Company, Inc are outlined in the tariff sheets below.
- 1222: Local wireline service is provided by Mukluk Telephone Company, Inc at a flat rate per month and includes unlimited local calling. This is the same service offered to Lifeline subscribers.
- 1223: Lifeline subscribers may choose to block toll access at no charge to them or choose a long distance provider of their choice for the best toll calling plans and rates available to them.

Mukluk Telephone Company

3000: Rate of Return Carriers Additional Documentation

54.313(g) Areas with no terrestrial backhaul

None of the Mukluk Telephone Company exchanges are connected by roads and all are served by satellite backhaul facilities. All locations are able to support the broadband service level of 1Mbps downstream/256kpbs upstream. Nome and Shaktoolik both have microwave middle mile access but are not able to support the broadband service level because of cost prohibitive backhaul facilities¹. Per the 3rd Order on Reconsideration the Federal Communications Commission has acknowledged this issue at Paragraph 46.

46. We appreciate the concerns raised by the Alaska Rural Coalition and ACS that it may not be cost-effective to serve certain customers due to the high cost of backhaul. Rather than granting a blanket exemption of the broadband obligations established for rate-of-return companies in the *USF/ICC Transformation Order*, we clarify, as the Alaska Rural Coalition requests, that our current rules provide sufficient flexibility to take into account any unique circumstances that may impact the ability of rate-of- return companies to extend broadband to their customers, including backhaul costs. As the Coalition notes, rate-of-return carriers are required to provide service meeting the specified characteristics on *reasonable* request, which, the Commission explained in the *Order*, was an obligation similar to the voice deployment obligation many of those carriers were already subject to. This obligation, enforced in the first instance by the relevant ETC-designating authority (generally the state), permits these entities to take into account backhaul costs or other unique circumstances that may make it cost-prohibitive to extend service to particular customers, in Alaska or any other area. We intend to carefully monitor developments in this regard and will consider making further clarifications or revisions if necessary.

Mukluk Telephone Company continues to seek economically sound solutions to address the provisioning of required broadband speeds given the extremely high costs of middle mile.

- 3005: Mukluk Telephone Company is a Privately held ROR Carrier and submits below a full and complete annual report of the company's financial condition and operations as of the end of the preceding fiscal year pursuant to 47 CFR 54.313(f)(2).
- 3019: Mukluk Telephone Company files as an audited single company a financial report in a format comparable to RUS Operating Report for Telecommunications Borrowers as provided by USAC in the FCC Form 481 Operating Report for Privately-Held Rate of Return Carriers upload template. This report includes data for the preceding fiscal year and the prior fiscal year for Mukluk Telephone Company. An officer of the company certifies the entries in this report are in accordance with the accounts and other records of the system and reflect the status of the system to the best of our knowledge and belief.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Grant Thornton LLP 310 K Street, Suite 200 Anchorage, AK 99501 T 907.264.6620 F 503.295.0148 www.GrantThornton.com

Board of Directors Mukluk Telephone Company, Inc.

We have audited the accompanying financial statements of Mukluk Telephone Company, Inc., which comprise the balance sheets as of December 31, 2013 and 2012, and the related statements of income, changes in stockholder's equity, and cash flows for the years then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Mukluk Telephone Company, Inc. as of December 31, 2013 and 2012, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of matter

As discussed in Note 1 and Note 8 to the financial statements, the Company adopted new accounting guidance in 2013 related to the accounting for goodwill, which allows for the amortization of goodwill in lieu of an annual impairment assessment. Our opinion is not modified with respect to this matter.
